WHY A NON-SURGICAL BROW LIFT CAN MAKE ALL THE DIFFERENCE

The eyes are a very important feature on the face. Their ability to be a highlight of the face is diminished by lines, wrinkles, eyebrow drooping and cheek volume loss – all things that can be successfully restored at **Portstewart Family Dental**.

of precisely injecting into specific muscles in the eyebrow, frown and forehead area to trigger a lifting effect. The results are a lifted, arched eyebrow that opens up the eyes to create a more engaging, dramatic look.

Benefits of Non-Surgical Brow Lift

- Instant results
- Rejuvenating
- Attractive arched brow
- Non-invasive technique – safer and lower cost vs surgery

Who is the Non-Surgical Brow Lift for?

The technique is ideal for anybody who is looking to lift the eyebrows and smooth the brow area. These are common areas of concern with the ageing process, but treatment is surprisingly effective at sculpting the eyebrows, as well as addressing lines and wrinkles.

What product is used?

We use anti-wrinkle treatment injections to achieve the result, but the key is the technique and precise positioning of the injections.

Will treatment make me look frozen?

It is a careful balance to get the right result while retaining a natural look and movement, but at Portstewart Family Dental we are trained to preserve and maintain eyebrow movement, which is the key to creating natural expressions.

Do I need any consultation before treatment?

We will always provide a consultation before treatment. Unlike many of our competitors, we offer this consultation free of charge to enable patients to fully discuss and understand

their treatment without having any financial commitment.

Will my family and friends know I've had an anti-wrinkle treatment?

Most often those that know you notice you look fresher, but don't specifically know why. Perhaps those who have had an anti-wrinkle treatment themselves and are particularly observant may have an inkling.

Can I go running after my anti-wrinkle treatment?

No, you must wait until 24 hours after your treatment before you can go running or do any other form of strenuous exercise.

Can I have an anti-wrinkle treatment if I am having other treatments? Such as glycolic peels, facials, dermaroller?

Yes, you can. If you are having an anti-wrinkle treatment THEN another treatment, you must leave it 48 hours. If you had another treatment and then you wanted an anti-wrinkle, you would have to wait two weeks before having your treatment.

Can I drink alcohol after anti-wrinkle treatment?

For the following 24 hours after you receive anti-wrinkle treatment,

you must not drink alcohol. After 24 hours, it is fine to drink alcohol.

If I want semi-permanent make up would I have anti-wrinkle before or after treatment?

You should have your anti-wrinkle treatment before having semi-permanent make up treatment on your eyebrows. This is because the anti-wrinkle can move the position of your eyebrows temporarily.

Can I go in the sun or use sunbeds after anti-wrinkle treatment?

You should avoid heat for 24 hours. This includes the sun, sunbeds and hot baths and showers.

Will I get addicted?

No! Anti-wrinkle treatment is not addictive. It does really work though so, like a good haircut, most clients do want to keep up the fab results once they've started having anti-wrinkle treatment and come back every four months or so to have another treatment.

How long do I have to wait between treatments?

You need to wait 12 weeks between full treatment doses.

How long after treatment can I have a follow up?

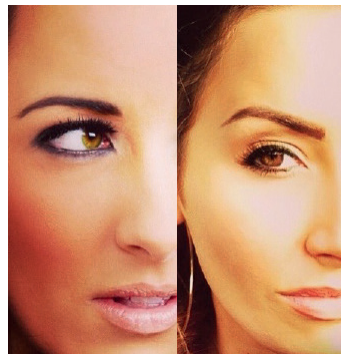

The effects of anti-wrinkle treatment are not seen immediately. You should start to notice a difference about three to seven days after your appointment and the treatment will be at its maximum at day 14.

We will send you a text message after 14 days to check how your treatment is looking. If you would like an adjustment to your anti-wrinkle treatment, you're welcome to book back in to be seen within the first month after your initial treatment and this will be free of charge.

Do I need a follow up appointment?

We prefer our patients to come back for a follow-up appointment, however it is not a clinical necessity. Many people do not need to come back in for an adjustment. If you would like an adjustment to your anti-wrinkle treatment, you're welcome to book back in to be seen within the first month after your initial treatment.

So give us a call and book for a free consultation!
