

BRING BRIGHT EYES BACK

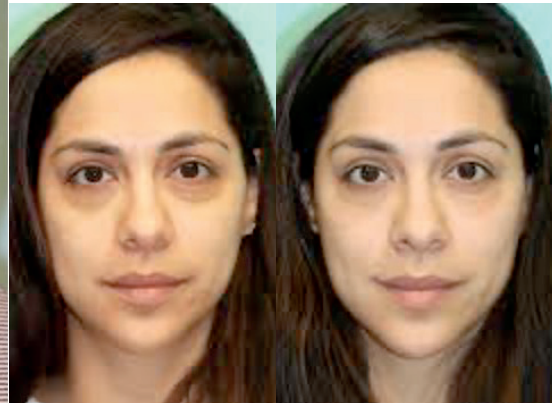

IMPROVE DARK CIRCLES AND HOLLOWNESS UNDER THE EYES WITH THE TEAR TROUGH TREATMENT AT PORTSTEWART FAMILY DENTAL.

We only use the Teosyal PureSense Redensity 2 product.

We use premium award-winning blunt cannulas, resulting in a smoother, less painful and safer experience with less chance of bruising in the delicate eye area.

At Portstewart Family Dental, we have performed many tear trough augmentations with remarkable results.

According to award-winning dentist Michele King of Portstewart Family Dental, a common complaint from patients is the under-eye area; that hollowness which makes them feel or look tired.

If you too feel this, we can provide fantastic results through injections with premium Teosyal PureSense Redensity 2 product. Currently, this is the only licensed product in the UK for treatment of tear troughs.

DEFINITION

Small volumes of dermal filler injections in the under-eye area will leave your eyes looking fresher, rejuvenated, with virtually no downtime.

WHO IS IT FOR?

For male or female patients who have developed hollowness and dark circles in the under-eye area.

SCIENCE

The human face loses volume in the cheek area through the natural ageing process, which can lead to hollowness and darkness in the under-eye area.

Over the age of 25, we lose our natural concentration of hyaluronic acid. Injections can therefore restore this.

Minimise dark circles and restore a youthful under-eye area

PROCEDURE

Your appointment will begin with a friendly consultation with Michele King detailing your past medical and cosmetic history.

Michele King will take photographs/video and talk through your facial anatomy. With the use of a medical pencil, we will draw out cheek volume loss and tear trough/under eye formation

The procedure itself is not painful, injections will take roughly 30 minutes.

Post procedure photographs will be taken - try to avoid make-up for 24hours.

A review appointment is arranged two weeks later to check results.

So, give us a call for a free consultation and let's talk about your concerns.

Until the next time....

Michele x
